

HEAVY-DUTY RIP-RAP PLANTS

LIPPMANN 62" X 24' PORTABLE RIP-RAP PLANT

The Lippmann Portable Rip-Rap Plant is a completely self-contained, high production screening and scalping unit which offers a full 62" wide by 24' long vibrating grizzly feeder. Other rip-rap plants are too narrow to stratify material in order to screen it efficiently and operate at maximum capacity. Lippmann's larger screening area offers 30% more capacity and prevents rock from stacking up. Smaller rock separates easily, so your plant can run at higher speeds to optimally produce the 4"-12" rip-rap you need.

- **Completely self-contained portable plant.**
- **62"x24' vibrating grizzly feeder offers up to 30% more capacity.**
- **Field-proven eccentric drive mechanism. Open flow-through tube arrangement for continual lubrication of vibrator assembly.**
- **Two 5' step deck grizzlies with adjustable bars.**
- **Replaceable abrasion resistant liners.**
- **2 axle, revolutionary box beam chassis design for easy access to chutes.**
- **End discharge for oversize product over 12".**
- **Side discharge chute at second step of feeder.**
- **36" cross conveyor for fines.**
- **Variable speed AC inverter electric drive. Cummins 113kW generator set allows you to run additional off-plant conveyor.**
- **Fifth wheel chassis hitch.**

Sold & Serviced By:

Wider vibrating grizzly feeder offers up to 30% more capacity. 5' step deck with adjustable bars. Replaceable abrasion resistant liners.

Substantially increased clearance space over conventional chassis designs. Unique box beam construction allows front-end loaders easy access to chutes at better angles.

Heavy-duty construction. Proven eccentric drive mechanism and flow-through tube arrangement for continuous lubrication of vibrator assembly.

Cummins 113kW generator set allows for additional off-plant conveyor operation.
